

About the Venues

The Perennial Farm is entering its 39th year. They started as a landscape design and installation company. These valuable landscape roots have given them valuable insight into the needs of garden centers and landscapers. They have created an environment dedicated to doing things efficiently in all of their operations. This means understanding how to grow and produce a mature plant that is the highest quality at the lowest cost. The Perennial Farm is recognized as the "Price Value Leader".

For more than 40 years, Manor View has always been committed to consistently providing the highest quality products while serving a market which consistently demands a higher level of selection, quality, and service. This philosophy dictates the type of people they employ, the variety and quality of materials that they offer for sale, and the size and varieties of plants they produce. Manor View has greatly expanded their supplier network, developed and diversified their customer base, expanded their field and propagation production and developed one of the best teams in the industry.
